

New Churches and Expansions

Growth of a church is a blessing and a challenge.

We can be your guide through the often daunting challenges of expansion and new construction to see your vision for growth realized. Here's how we can help:

- **Conceptualization**
Collaborate with pastor, church leaders and other members of the congregation to translate their ideas into a solid design and budget
- **Fundraising**
Create renderings and animations to help promote the concept
- **Permitting & Code Compliance**
Navigate through the maze regulations, historic tax credits ^[1] and permit approvals.
- **Construction**
Produce construction documents, work with contractors and see the job through to completion

Below is an animated walkthrough of a church expansion we designed. The pastor is currently using it along with renderings as effective tools to increase awareness and fundraising for the project.

Our goal on every project is to exceed the client's expectations for creative, workable design solutions and value. Contact us ^[2] to see how our experience, high standards, and quick turnaround can benefit your plans for growth. We look forward to hearing from you!
